

Individual Noncash Contributions, 2008

by Pearson Liddell and Janette Wilson

For Tax Year 2008, 23.0 million individual taxpayers who itemized deductions reported \$40.4 billion in deductions for noncash charitable contributions.¹ Of these taxpayers, 7.0 million reported \$34.6 billion in deductions for charitable contributions on Form 8283, *Noncash Charitable Contributions*. This form is used by individual taxpayers when the amount of taxpayer deductions for all non-cash donations on Schedule A, *Itemized Deductions*, exceeds \$500. The number of taxpayers filing Form 8283 increased slightly, by 1.2 percent, from 6.9 million in Tax Year 2007, while the amount of donations decreased 34.5 percent from \$52.8 billion in 2007. Between Tax Years 2007 and 2008, corporate stock donations declined 48.0 percent, from \$23.7 billion to \$12.3 billion. For Tax Year 2008, there were no notable tax law changes that affected the deductions allowed for noncash charitable contributions.

Despite the decline in corporate stock donations since Tax Year 2007, corporate stock donations accounted for the largest percentage of total noncash donations in Tax Year 2008. Clothing donations of \$7.9 billion accounted for the second largest percentage of total noncash donations (22.9 percent), followed by household item donations of \$3.1 billion, 9.1 percent of total noncash donations (Figure A). The average corporate stock donation was \$99,912 per return, and, while clothing and household items together represented 32.0 percent of all donations claimed, the average donation, per return, of clothing and household items was much smaller at \$1,457 and \$1,286, respectively. The highest average deduction per return was for investment donations (excluding stock and mutual funds) of \$531,842, followed by conservation easement donations of \$380,541.²

As stated above, although the number of taxpayers claiming donations increased 1.2 percent from 6.9 million in Tax Year 2007 to 7.0 million in 2008, the amount of donations claimed declined 34.5 percent from \$52.8 billion to \$34.6 billion in 2008 (Figure B). Corporate stock and clothing donations represented the highest amounts claimed for both Tax

Years 2007 and 2008. Donations of corporate stock declined 48.0 percent from \$23.7 billion in Tax Year 2007 to \$12.3 billion in 2008; as a proportion, donations of corporate stock decreased from 44.9 percent of all donations in 2007 to 35.7 percent in Tax Year 2008. In contrast, the amount taxpayers claimed for clothing donations increased 3.9 percent from \$7.6 billion in Tax Year 2007 to \$7.9 billion in Tax Year 2008; these donations represented 14.4 percent of all donations in Tax Year 2007 and 22.9 percent in 2008. Donations of household items decreased 20.1 percent from \$3.9 billion in Tax Year 2007 to \$3.1 billion in 2008. In terms of the amount claimed, household donations were the third largest category of donations in 2008, up from fourth largest in Tax Year 2007. From Tax Year 2007 to 2008, land donations decreased 63.2 percent from \$4.0 billion to \$1.5 billion. As a proportion of all donations, land donations decreased from 7.7 percent in 2007 to 4.3 percent in 2008.

Figure B also shows some other significant changes between Tax Years 2007 and 2008. Taxpayer donations of mutual funds declined 59.0 percent from \$1.4 billion in Tax Year 2007 to \$0.6 billion in 2008. In addition, land (as stated above) and easement donations also declined substantially. The amount deducted for all easement donations declined 44.1 percent from \$2.2 billion in Tax Year 2007 to \$1.2 billion in 2008. The amount claimed for car donations declined 23.2 percent between Tax Years 2007 and 2008, from \$0.6 billion to \$0.4 billion.

In terms of average donations per return, the overall average amount claimed decreased between Tax Years 2007 and 2008, from \$7,617 to \$4,930. Average corporate stock donations decreased between the 2 tax years, from \$117,458 to \$99,912. Although the amount that taxpayers claimed for mutual funds and other investments declined between Tax Years 2007 and 2008, average donations per return increased for both categories, from \$100,205 to \$129,776 for mutual funds and \$461,783 to \$531,842 for other investments. The average donation of land per return declined significantly from \$518,156 in 2007 to \$164,944 in 2008. In addition, the average easement donation per return declined from \$885,061 in Tax Year 2007 to \$284,488 in 2008.

Pearson Liddell and Janette Wilson are economists with the Individual Research Section. This article was prepared under the direction of Michael Strudler, Chief.

¹ For further details on Tax Year 2008 individual income and tax statistics, see *Statistics of Income—2008, Individual Income Tax Returns* (IRS Publication 1304).

² The deduction amounts reported in this article include the amount carried to Schedule A for reporting itemized deductions.

[1] Total number of returns does not equal the sum of returns by donation type because a return could have more than one type of donation.

[2] Less than 0.05 percent.

[3] Other donations include donations of intellectual property.

Taxpayers with adjusted gross income (AGI) of \$10 million or more collectively deducted 6.1 percent of their AGI in noncash contributions, claiming \$9.2 billion on approximately 4,250 Forms 8283 (Figure C). Donations from this group of taxpayers represented 26.7 percent of all individual taxpayer donations in Tax Year 2008. Taxpayers in the \$100,000 to \$200,000 AGI group gave \$5.7 billion (1.7 percent of their AGI) on 2.5 million tax returns, which represented 16.4 percent of all donations claimed. Those taxpayers in the \$200,000 to \$500,000 AGI category gave \$3.8 billion (11.0 percent of donations claimed). Overall, the average donation amount for all taxpayers claiming donation deductions was \$4,930 per return. Taxpayers with AGI of \$10 million or more claimed \$2.2 million per return, followed by an average donation of just over \$320,000 by those in the \$5 million to \$10 million AGI group.

A comparison of donation amounts by AGI group across Tax Years 2007 and 2008 is shown in Figure D. Overall donations decreased 34.5 percent

between Tax Years 2007 and 2008, as cited above, and most AGI groups showed a decrease in the amount of donations reported. There were some exceptions, the most notable being donations claimed by taxpayers in the under \$25,000 AGI groups, whose donation amounts increased 60.1 percent between Tax Years 2007 and 2008, from \$0.9 billion to \$1.4 billion. Almost all of this increase was for taxpayers with negative AGI. Donations claimed by those taxpayers with AGI greater than \$10 million declined 47.6 percent, from \$17.6 billion in Tax Year 2007 to \$9.2 billion in 2008. This decline was in conjunction with the AGI for this income group decreasing by 38.7 percent, from \$245.9 billion in Tax Year 2007 to \$150.7 billion in 2008. Despite this decrease, donations made by this group still represented more than one-fourth (26.7 percent) of all donations claimed in 2008; donations made by this group were one-third of all donations in 2007. Taxpayers making \$10 million or more in AGI donated 6.1 percent of their AGI in 2008, compared with 7.2 percent in

[1] Total number of returns does not equal the sum of returns by donation type because a return could have more than one type of donation.

[2] Other donations include donations of intellectual property.

Tax Year 2007. Donations by those taxpayers in the \$100,000 to \$200,000 and \$200,000 to \$500,000 AGI groups also declined by 7.3 percent and 42.6 percent, respectively, between Tax Years 2007 and 2008, from \$6.1 billion to \$5.7 billion for the former group, and from \$6.6 billion to \$3.8 billion for the latter group. Donations claimed by taxpayers in the \$5 million to \$10 million AGI group decreased 50.9 percent, from \$3.7 billion in Tax Year 2007 to \$1.8 billion in 2008. Lastly, taxpayers with AGI between \$2 million and \$5 million had the largest percentage decline in the amount of noncash contributions for 2008, with donated amounts falling by 51.9 percent from 2007 levels.³

Information on donee organizations is presented in Figures E, F, and G. Figure E shows that, for Tax Year 2008, most donations, in terms of amount

claimed, were given to large organizations and foundations (\$8.6 billion and \$8.1 billion, respectively). Donations to large organizations represented 25.0 percent of the total donation amount, and donations to foundations represented 23.3 percent. The largest average donation of \$76,170 per return was made to foundations; in contrast, the average donation to large organizations was about \$1,620, second lowest only to \$1,525 for donations to health and medical research organizations. The second highest average donation amount was made to donor-advised funds (just over \$70,000). However, in contrast to foundation donations, donor-advised funds received only 4.6 percent of the total amount deducted by taxpayers on the Schedule A.

Donations to almost all donee types declined between Tax Years 2007 and 2008 (Figures F and G).

³ For further details on Tax Year 2007 noncash charitable contributions, see *SOI Bulletin, Statistics of Income—2010, Individual Noncash Contributions, 2007* (IRS Publication 1136).

Donations to educational institutions declined by the largest percentage (62.0 percent) from \$8.1 billion in Tax Year 2007 to \$3.1 billion in 2008. These donations represented 15.4 percent of donations claimed in 2007 and just 8.9 percent in Tax Year 2008. The average donation per return to this donee type was about \$18,010 in Tax Year 2007 and \$7,950 in 2008. Another notable decrease was in donations made to foundations, which declined 42.6 percent from \$14.1 billion in Tax Year 2007 to \$8.1 billion in 2008; these donations represented 26.6 percent of all donations claimed in 2007 and 23.3 percent in 2008. In addition, the average donation per return for this donee type declined from more than \$117,300 in Tax Year 2007 to \$76,170 in 2008. The one exception to these declines was contributions to large organizations, which increased slightly, by 0.7 percent between Tax Years 2007 and 2008. These donations, valued at \$8.6 billion, represented 25.0 percent of all donations reported in Tax Year 2008 and 16.2 percent in Tax Year 2007. Despite this increase, the average donation per return made to large organizations in

Tax Year 2008 was about \$1,620, which was slightly lower than \$1,640 in 2007.

In comparing donations by different age groups, taxpayers age 65 and older gave the most in terms of the amount reported on Schedule A. This group gave \$13.8 billion in cash contributions (40.3 percent of the total cash contributions of \$34.3 billion) and \$14.0 billion in noncash contributions on Form 8283 (40.4 percent of the total noncash contributions of \$34.6 billion) in Tax Year 2008. Figure H shows that the average noncash donation amount per return for these taxpayers was nearly \$14,650, which was more than three times the average of any other age group. In addition, taxpayers in this age group donated 7.7 percent of their AGI amount of \$181.9 billion in noncash contributions, also more than three times the percentage of any other group. Details from Table 4 show that, of the \$14.0 billion in donations made by taxpayers 65 or older, \$9.2 billion (65.9 percent) were donations of corporate stock, mutual funds, and other investments. For these taxpayers, real estate and easement donations were the next largest category, at

[1] Total number of returns does not equal the sum of returns by donee type because a return could have donations to more than one type of donee.

\$1.4 billion. Those taxpayers age 45 under 55 made noncash donations of \$7.5 billion (2.0 percent of their AGI), with an average per return donation of about \$3,710. Those taxpayers age 55 under 65 donated slightly less (\$6.8 billion or 2.5 percent of their AGI), and their average donation per return was somewhat higher, at approximately \$4,425.

Figure I shows that all age groups donated considerably less in Tax Year 2008 compared to 2007. Donations made by taxpayers under 35 declined by the largest percentage (61.3 percent), from \$5.6 billion claimed in Tax Year 2007 to \$2.1 billion in 2008. Those taxpayers over 65 deducted the most in both Tax Years 2007 and 2008, claiming \$21.4 billion and \$14.0 billion, respectively. Although their donations declined by 34.6 percent, these taxpayers deducted about 40.0 percent of the total amount claimed in both tax years. The average donation per return for these taxpayers declined from just over \$23,600 in 2007 to about \$14,650 in Tax Year 2008. Of the 7.0 million returns filed with noncash donation deductions for Tax Year 2008, 13.6 percent (nearly 956,000) were filed by those taxpayers over 65. This is an increase of 5.5 percent from 2007, when, of the 6.9 million returns filed, approximately 906,000 (13.1 percent of all returns) were filed by this age

group. For Tax Year 2008, taxpayers 45 through 55 reported donations of \$7.5 billion (21.7 percent of total donations), second highest among the age groups. These taxpayers had an average donation per return of approximately \$3,710. For Tax Year 2007, this group reported \$9.6 billion in donations (18.1 percent of total donations), third highest among the age groups behind taxpayers 65 and older and those between 55 and 65.

Explanation of Selected Terms:

Amount carried to Schedule A—This is the fair market value from Section A (items with a deduction of \$5,000 or less or publicly traded securities) plus the lesser of the fair market value or amount claimed on Section B (items with a deduction of more than \$5,000). The dollar amounts of donations reported in this article reflect the amounts reported on Form 8283 that are carried to Schedule A for reporting itemized deductions.

Donor's cost—Also known as the adjusted basis or tax basis, this is generally the amount that the owner paid for the property. If the property were received as a gift, the original cost carries over to the recipient of the gift, increased by any gift tax paid on the appreciated portion of the property. If acquired

Individual Noncash Contributions, 2008

Statistics of Income Bulletin | Winter 2011

Figure G

Amount of Individual Noncash Charitable Contributions, by Donee Type, Tax Years 2007 and 2008

from a decedent, the basis is the fair market value of the property used for estate tax purposes.

Fair market value—The fair market value is the value a willing and knowledgeable buyer would pay a seller in a voluntary situation.

Number of donations—For this study, data were collected in the manner they were reported by the taxpayer. For example, if clothing were listed twice, even though it was given to the same donee organization, it was counted as two separate donations.

Number of returns—This is the number of returns for which a Form 8283 was attached in the Individual SOI sample. For this study, all returns with Form 8283 were counted, whether or not the taxpayer carried the Form 8283 amounts to the Schedule A.

Please note that the allowable amount of a non-cash deduction depends on whether the property is ordinary income or capital gain property. Ordinary income property is property, that if sold, would generate ordinary income or short-term capital gain. Examples are clothing, household items, inventory, and capital assets held less than 1 year. Capital gain property results in a long-term gain, if sold. Examples of this are real property used for a taxpayer's business and corporate stock held more than 1 year. The total charitable deduction is generally limited to no more than 50 percent of AGI. This amount can be reduced to 30 percent or 20 percent, depending on the type of property donated and the type of charitable organization. The statistics for this article include

the entire deduction amount reported by taxpayers and transcribed from Form 8283 to line 17 of Schedule A. The limitations are then applied to the amount reported on line 19 of that schedule.

Donated Property Types:

Accessories—Includes belts, furs, jewelry, purses, scarves, and watches.

Art and collectibles—Includes art works, such as ceramics, drawings, paintings, photographs, and sculptures; and collectibles including coins, books, historical documents, memorabilia, rare or valuable clothing, jewelry, and stamps.

Cars—Includes vehicles designed for road transportation, such as cars, buses, motorcycles, motor homes, SUVs, and trucks.

Clothing—Includes apparel for children, men, and women, such as coats, dresses, hats, shoes, and suits. Also includes sports and school uniforms.

Conservation easements—Includes land and right of way easements. Donations of this type must be a qualified real property interest contributed to a qualified organization for conservation purposes.⁴

Corporate stock—Includes shares of publicly traded and closely held common and preferred stock, as well as stock rights.

⁴ Notice 2007-50, Guidance Regarding Deductions by Individuals for Qualified Conservation Contributions, includes a tax law change for conservation contributions such that the 50-percent-of-AGI limitation is increased to 100 percent (the 100-percent limitation) for eligible farmers and ranchers. This may have been a partial cause for the 31.2-percent increase in the amount of conservation easements for Tax Year 2007.

Individual Noncash Contributions, 2008

Statistics of Income Bulletin | Winter 2011

Electronics—Includes cameras, computer systems, copiers, DVD players, fax machines, stereo systems, televisions, telephones, and video games.

Façade easements—Includes real estate easements and historical preservation or architectural easements.

Food—Includes beverages, individual food items or meals, snacks, restaurant coupons, vitamins, and wine.

Household items—Includes appliances, books, exercise equipment, furniture, luggage, tools, and toys.

Intellectual property—Includes copyrights, patents, trademarks, trade names, trade secrets, and certain types of software.

Land—Includes farms, orchards, and open lots.

Mutual funds—Includes shares of taxable and nontaxable mutual funds, exchange-traded funds, and unit investment trusts.

Other investments—Includes annuities, bonds, CDs, life insurance policies, notes, options, partnership interests, and real estate investment trusts.

Other vehicles—Includes all-terrain vehicles, airplanes, and watercraft vehicles such as boats, canoes, ships, and water-skis.

Real estate—Includes apartments, cabins, houses, and other residential and commercial property.

Services—Includes audio presentations, catering, healthcare services, transport and travel expenses, tutoring and other professional services.

Other—Includes animals, building materials, cemetery plots, medical equipment, tickets to events, and donated vacations or use of vacation property.

Donee Organizations:

Arts, culture, and humanities—Includes organizations involved with the arts, music, history, and cultural activities, such as museums, libraries, science centers, and theaters.

Donor-advised funds—A segregated fund within a public charity that permits the donor to have advisory privileges on distributions or investments. Donations to donor-advised funds may be understated because of the difficulty of identifying all such donations.

Educational institutions—Includes organizations whose primary function is educational, such as fraternities, schools (including those with religious affiliation), scholarship funds, and universities.

Environmental and animal organizations—Includes organizations that protect, promote, or seek to improve the environment or welfare of animals, such as local animal shelters, botanical gardens, and garden clubs.

Foundations—A foundation is a type of philanthropic organization set up by individuals or institutions as a legal entity (usually either a corporation or trust) with the purpose of distributing grants to support causes in line with the goal of the foundation. For the purpose of this study, this includes private foundations, which are often specific to a person or family, and community foundations.

Health and medical research—Includes hospitals, medical associations, nursing homes, and hospices.

Large organizations—Includes large national and international organizations that have local chapters, such as Goodwill Industries International, The Salvation Army, United Way International, Habitat for Humanity International, and Boy Scouts of America.

Other—Includes all other organizations that are not included in any other category.

Public or societal benefit—These are organizations that benefit individuals or communities and do not meet the conditions of other categories, such as education, health, and religion. These include homeless shelters, food banks, and political think tanks.

Religious organizations—Includes churches, synagogues, and book stores and thrift stores run by religious organizations.

Data Source and Limitations

These statistics are based on a sample of individual income tax returns (Forms 1040, 1040A, and 1040EZ, including electronically filed returns) filed during Calendar Year 2009. Returns in the sample were stratified based on: (1) the larger of positive income or negative income (absolute value); (2) the size of business and farm receipts; (3) the presence or absence of specific forms or schedules; and (4) the

usefulness of returns for tax policy modeling purposes. Returns were then selected at rates ranging from 0.10 percent to 100 percent.

Tax Year 2008 data are based on a sample of 328,630 returns and an estimated final population of 142,580,866 returns.⁵ The number of returns in the sample with Form 8283 was 42,127.

Since the data presented here are estimates based on a sample of returns filed, they are subject to sampling error. To use the statistical data provided

properly, the magnitude of the potential sampling error must be known; coefficients of variation (CVs) are used to measure that magnitude. Figure J shows estimated CVs for the numbers of returns and money amounts for selected income items. The reliability of estimates based on samples and the use of CVs for evaluating the precision of estimates based on samples are discussed in SOI Sampling Methodology and Data Limitations later in this issue of the *Bulletin*.

⁵ For further details on the description of the sample, see *Statistics of Income—2008, Individual Income Tax Returns* (IRS Publication 1304).

* Estimates should be used with caution because of the small number of sample returns on which they are based.

[1] Not every donation has a donor cost reported.

[2] Amount carried to Schedule A is the fair market value from Section A (items with a deduction of \$5,000 or less or publicly traded securities) plus the lesser of the fair market value or the amount claimed on Section B (items with a deduction of more than \$5,000).

[3] Other donations includes intellectual property, services, airline tickets and miles, and other donations.

\$2,000,000 under \$5,000,000	3,353	4,856	124,337	384,048	346,424
\$5,000,000 under \$10,000,000	1,139	1,777	52,108	211,721	166,828
\$10,000,000 or more	1,094	1,963	60,153	717,848	660,870

* Estimates should be used with caution because of the small number of sample returns on which they are based.

[1] Not every donation has a donor cost reported.

[2] Amount carried to Schedule A is the fair market value from Section A (items with a deduction of \$5,000 or less or publicly traded securities) plus the lesser of the fair market value or amount claimed on Section B (items with a deduction of more than \$5,000).
